Your Needs Are Different – And So Is Re-Max For Women

As difficult as hair loss is for men, it can be absolutely devastating for women. Although balding men have several treatment choices, the lack of options available to women with thinning hair can cause even greater anxiety and low self-esteem. Fortunately, it doesn't have to be traumatic any more. Through his long experience in treating hair-loss patients, both as a psychiatrist and medical specialist, Dr. Klein understands the embarrassment and emotional distress a woman can feel. That is why he developed Re-Max for Women, a new formulation that encourages healthy hair growth without side effects.

What makes Re-Max for Women different?

You may have heard that the two most popular treatments for men Regaine 5% and Propecia – are not appropriate for women. Re-Max for Women is a special formulation of 2% Minoxidil and 425% Retin A, plus moisturizers and vitamins in a specially designed cosmetic hair cream. It is customized to stop hair loss.
